

KEDAR LIMBALKAR

Data Engineer

kedarlimbalkar@gmail.com | +91-9284374129 | Pune, Maharashtra | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Engineer with hands-on expertise in building scalable ETL/ELT pipelines, workflow orchestration, and database design using Apache Airflow, Docker, and PostgreSQL. Proven track record of designing reliable, automated pipelines with strong error handling, logging, and data quality practices, backed by a solid foundation in Python and SQL.

TECHNICAL SKILLS

Languages & Scripting: Python, SQL

Data Pipeline & Orchestration: Apache Airflow, ETL/ELT Pipelines, DAGs, Workflow Automation, Batch Processing

Databases & Data Warehousing: PostgreSQL, MySQL, BigQuery, Snowflake, Data Modeling, Schema Design

DevOps & Infrastructure: Docker, Docker Compose, Git, GitHub, CI/CD, REST APIs

Data Engineering Practices: Data Validation, Cleaning, Quality Checks, Error Handling & Retries, Logging & Monitoring

Programming Libraries: Pandas, NumPy, Psycopg2, Requests, PySpark

ML/Analytics Exposure: TensorFlow, EDA (Exploratory Data Analysis), Statistical Analysis

WORK EXPERIENCE

Intucate | Business Analyst Intern

January 2026 – April 2026

- Analyzed data flows and content performance metrics across systems, applying structured data analysis techniques that improved engagement tracking accuracy by 15% for target demographics.
- Gathered and translated cross-team data requirements into structured workflows and pipeline specifications, aligning data needs across 3+ departments and engineering teams.

PROJECTS

Crypto ETL Pipeline | [GitHub](#)

March 2026 – April 2026

Technologies: Python, Apache Airflow, PostgreSQL, Pandas, Docker, Docker Compose, Requests, Psycopg2, ETL

- Architected an end-to-end ETL pipeline extracting live market data for the top 20 cryptocurrencies from the CoinGecko API, transforming records with Pandas (null handling, symbol normalization) and loading into a structured PostgreSQL schema.
- Orchestrated daily automated workflows with Apache Airflow DAGs and retry logic (2 retries, 5-minute delay), and containerized the full stack with Docker Compose for reproducible, zero-config deployment.

Conversational AI for Retail | [GitHub](#) | [Drive](#)

January 2026 – February 2026

Technologies: Python, LangGraph, LangChain, Llama 3.3, FAISS, RAG, Vector Embeddings, NLP, Prompt Engineering, Multi-Agent Systems

- Engineered a data preprocessing pipeline handling 44,884 retail records using a 3,000/500 token chunking strategy, structuring output into a FAISS vector data store with 100% semantic integrity for rapid retrieval.
- Built a multi-agent LangGraph pipeline integrating retrieval and generation stages, sustaining sub-1.2s query latency across 10,000+ user interactions while reducing manual workload by 40%.

Emotion Recognition System | [GitHub](#) | [Drive](#)

February 2026 – March 2026

Technologies: Python, Keras, TensorFlow, CNN, OpenCV, Streamlit, Computer Vision, Deep Learning, Transfer Learning, Batch Normalization

- Built a data processing and classification pipeline handling 35,000+ facial images across 7 categories, structuring inputs for consistent model consumption with Dropout and Batch Normalization stages.
- Deployed a real-time inference pipeline with OpenCV and Streamlit, integrating live data capture and processing at 30+ FPS for continuous system throughput.

EDUCATION

MS in Computer Science: Machine Learning & AI Engineering — Woolf University

2025 – 2027

Relevant Coursework: Machine Learning, Artificial Intelligence, Deep Learning, NLP, Data Science, Statistical Modeling

B.Tech in Computer Engineering — Government College of Engineering, Jalgaon

2021 – 2025

CERTIFICATIONS & ACHIEVEMENTS

Full Stack Data Science and AI | AlmaBetter | [View Certificate](#)

- Completed 6 production-ready ML/DL projects across 8+ datasets spanning machine learning, deep learning, NLP, and Docker-based MLOps deployment.
- District Winner — National Level Computing Intelligence Olympiad (CIO): ranked 1st in logical reasoning and data interpretation among 500+ participants.
- Core Member, Technical Council 2025 — coordinated 3 national-level events, managing logistics for 200+ attendees.
